

CROSSTAB REPORT

NH housing pulse (MVP)

Landscape Rasmussen-style cuts of every complete to date.
Unweighted. $n = 3$. Fielded 7–8 September 2026. New Hampshire.

Questions: housing costs as a top priority · property-tax relief as a top priority.

Graph stance: agree if agree $> +1$, disagree if agree < -1 , else neutral.

Web join forms are missing most RR facets; the iPhone complete is the full profile.

NOTES

How to read this set

- This is an operator dump, not a public release table. Cells with n < 30 are shown.
- No likely-voter weights. Percents are column percents of completes in that cell.
- Two web completes (ZIP 03060, undeclared women 40–64) used the short join form.
- One iPhone complete (ZIP 03052, Republican man 40–64, suburban, \$200k+, some college) used the full instrument, including traffic lights.
- Political Party keeps web **Undeclared** as its own cell; RR Other is empty.
- Missing columns are empty profile fields, not refusals coded as Prefer not.
- Traffic-light and thumb rows live in crosstab-wide.csv; these pages are the RR graph cuts.
